

## Pattern Correction: Ginger #293

These corrections apply to the Ginger pattern released in May 2017.

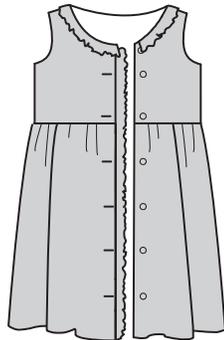

### Pattern

The pattern piece #5 Back Skirt should read View A: Cut 1 on Fold, Cut 1 Lining on Fold; VIEW B: Cut 1 on Fold.

On pattern piece #4 Front Skirt, the dot near the hem should be 3" higher for a total of 7" above the bottom cutting line.

### Instructions

The diagram for step #20 is incorrect. Please reference the diagram below. This error is on the first version of the instructions (CCP 293-1).

## How to Determine Which Pattern Version You Have

As we find printing errors, we will make corrections to the subsequent printings of covers, instructions and patterns. We began including trackable version codes with the newly branded pattern covers and patterns with the navy and aqua branding. Make sure to check the version number for the item specified as the covers, instructions and patterns are all printed separately. Patterns released prior to the navy and aqua branding like those in the top pink band or paper envelopes do not have a code to track versions.

For covers, the version code is found on the back cover at the bottom. There will be a code like "CC3S-1". The last number, in this case 1, is the version of the cover. In this example, this is the first printing of the cover. From time to time, we may apply a sticker to the covers to fix an error between printings.

For instructions, the same version code is found in the bottom right-hand corner of each instruction page. Each sheet can be updated separately, so check each page.

For patterns, the same version code is found on each page of tissues. Each sheet can be updated separately, so check each page.
